Resolution proposed by the board of directors of Ferronordic AB (the "Company") regarding issue of Warrants to the management in the Company.

Proposal concerning issue of Warrants to be distributed to the management in the Company

The board of directors proposes that the AGM on 25 June 2020 adopts a resolution to issue Warrants as part of a long-term incentive program (the "**Incentive Program**") directed to employees forming the management of the Company or its subsidiaries (together the "**Participants**", individually a "**Participant**"). Together with external advisors, the board of directors has prepared this proposal and is convinced that the Incentive Program as described here will be beneficial for the Company's shareholders by further aligning the interests of the Company with those of the Company's management and by facilitating the recruitment and retention of competent employees. For the incentive program and the issue of Warrants, the following main conditions and guidelines are proposed to apply.

Main terms and conditions

1. The Company will issue a maximum of 764,865 Warrants (the "**Warrants**"), each granting a right to subscription of one (1) ordinary share in the Company against payment of an exercise price determined as 135% of the average volume-weighted share price during the 10 trading days immediately preceding the date of the AGM's decision on the issue of the Warrants.
2. With deviation from the shareholders' preferential rights, the Warrants may only be subscribed for by Ferronordic Germany Holding AB (reg. No. 559211-4275) (the "**Subsidiary**"), with the right and obligation for the Subsidiary to assign the Warrants to the Participants, or where applicable, to a company fully owned by Participants, as stated in Appendix 2. The Subsidiary shall not have the right to dispose over the Warrants in any other way than stated in the Appendix 2.

The reason for the deviation from the shareholders' preferential right is to implement the Incentive Program.

3. The majority of the Participants are current employees of the Company or its subsidiaries, but the Incentive Program is also intended to include a small number of management personnel yet to be recruited. A decision on final allocation will then be made by the Board.

The number of Warrants allotted to each category of Participants is set forth in Appendix 1.

4. Subscription of the Warrants shall be made at the latest on 1 July 2020. The board of directors is allowed to extend the subscription period. The purchase price for the Warrants shall be paid within 30 days from the date of subscription.

5. Both the Subsidiary's subscription of the Warrants and the Participants' acquisition of the Warrants according to the distribution shall be made at market value at the time of subscription and acquisition of the Warrants. Payment for subscription by the Subsidiary of the Warrants shall be made immediately after subscription. The market value is determined according to a valuation performed by the Company's independent financial advisors using the Black and Scholes model for pricing options.

According to a preliminary valuation based on a market value of the underlying share of SEK 100.5, the market value of the Warrants amounts to SEK 4.9 per Warrant, assuming a subscription price of SEK 135.7 per share, a volatility of 30 percent and a risk-free interest rate of 0.3 percent during the term of the Warrants. The total value of the Warrants under the Incentive Program according to this preliminary valuation is SEK 3 772 860.

6. Each participant is given the opportunity to acquire the number of Warrants he or she has been awarded for a price corresponding to the determined market value at the time of the acquisition. To avoid a situation where the total financial result could be negative for the Participants, each Participant will receive cash compensation from the Group-company where the Participant is employed, which after tax deduction covers the cost of acquiring the Warrants from the Subsidiary.
7. The exercise price per share shall correspond to 135% of the average volume-weighted share price during the 10 trading days immediately preceding the day of the AGM's decision to issue the warrants.

The subscription price cannot be set lower than the quota value of the shares.

The Company's share capital would increase by SEK 68,289.44 upon full subscription for shares.

8. The exercise price per share or the number of shares for which each Warrant entitles the holder to subscribe shall be recalculated in accordance with customary conversion terms in the event of a split, new issue, bonus issue or similar measures. However, if such a conversion causes the exercise price to fall below the quota value for a share in the Company, the exercise price must still correspond to the share's quota value.
9. Notification of subscription for shares may take place during the period from July 1, 2023 through December 15, 2023. In case a Warrant is not exercised during this period of time, all rights under such Warrant lapse.

Subscription may only take place in respect of the whole number of shares for which the total number of Warrants entitles the Participant to subscribe and which a single Participant desires to exercise. On such Subscription, any excess fractions of Warrants which cannot be exercised shall be disregarded.

Upon such notification of subscription, for registration measures, a written and completed registration form in accordance with the prescribed form shall be submitted to the Company

or anyone the Company appoints. Notification of subscription is binding and cannot be withdrawn by the subscriber.

Upon notification of subscription, payment shall be made immediately in cash for the number of shares to which the subscription notification relates. Payment shall be made to an account designated by the Company.

10. A share that has been issued after subscription entitles the holder to dividend as of and including the record date for dividend that falls after the new shares have been included in the share register.
11. For the grant of Warrants and continued participation in the Incentive Program, a Participant must be employed by the Company or its subsidiaries and enter into a separate option agreement with the Company under which the Participant undertakes, under certain conditions and with certain exceptions, to sell back some or all of the acquired Warrants to the Company if the Participant's employment in the Company or its subsidiaries is terminated before three years have elapsed from the date of transfer of the Warrants to the Participant or until subscription has taken place.

The Board shall be entitled to cancel Warrants that have not been transferred to Participants or Warrants repurchased from Participants.

12. Participation in the Incentive program presupposes that such participation can legally take place and, in the Board's opinion, such participation can be done with reasonable administrative and financial costs for the Company.

Full terms and conditions for the Warrants are set out in Appendix 3.

Costs

The cost of implementing this proposed Incentive Program for the Company and its subsidiaries primarily consists of the cost for tax and social security contributions that arise as a result of the compensation to be paid to the Participants for acquiring the Warrants that is to be paid by the Group Company where the Participant is employed. The compensation covers the purchase price and the subscription fee for the Warrants and is thus paid to the Company. The total cost to the Group for taxes and social security contributions for this is based on the preliminary valuation mentioned under point 5 above estimated to be SEK 3.1 million. In addition, costs for external advisers are estimated to amount to SEK 150,000.

Since the Warrants are transferred at market value at the time of the transfer, the actual transfer of the Warrants is not considered to entail any costs to the Company in the form of social security contributions or the like.

Dilution

In total, the issuance under the Incentive program would mean that the Company would issue Warrants allowing for subscription of a maximum of 764,865 shares in the Company, which corresponds to a maximum EPS/DPS dilution of 5% assuming that all Warrants under this Incentive Program are exercised.

As of the date of this proposal, there are 14,532,434 shares in the Company. The number of shares that may be subscribed for thus constitutes 5.3% of the currently outstanding shares in the Company.

Impact on key figures

The Incentive Program is expected to have only a marginal impact on the Company's key performance ratios.

Preparation of the proposal for the Incentive Program

The proposal has been prepared by the Board in consultation with external advisers. The proposal was unanimously approved by the Board.

Outstanding share-related incentive programs

The Company does not have any warrants outstanding. The Company has previously paid a cash bonus to senior executives annually with the commitment for the participants to acquire shares in the Company for the funds paid and to undertake not to sell these shares for a period of three years. No such program will be implemented for 2020, should the Incentive Program be implemented.

Majority requirements and authorisation

Resolution according to this proposal must be supported by shareholders with at least nine tenths of the votes cast as well the shares represented at the annual general meeting.

Dan Eliasson is proposed to be authorised to make such minor adjustments that may be required in order to register the resolution with the Swedish Companies Registration Office.
